About us...

Mehta group of companies is an expert organization, managing in distinctive sorts of Natural and Chemical items. The organization was set up in 2006, and from that point forward we have increased persistent accomplishment to end up a prestigious name in the bio manure industry. Through thorough innovative work, the organization is accompanying most recent definitions and creations of natural manures for plant development and improvement. These manures are experimentally detailed for current aggressive business sector.

Mehta Overseas India utilizes gifted and responsive workforce, who are dependable and responsible for their occupation profile. Proficient showcasing experts advance our image and address all the item related questions of our clients.

Mehta Overseas India is one of the main producer and advertisers of Agriculture Products like Micro Nutrients, Bio-Organic Manure, Bio-Fertilizers, Bio-Pesticides, Bio-Activators and Bio Culture Products in Division of Mehta Bio-Tech. from Ahmedabad, Gujarat, INDIA.

The company has also been engaged in production of variety of fragrances, perfumes and food flavors catering to numerous industries.

Our products are of relevance in incense sticks, tobacco, pan masala and Smoke Fragrance, soaps, detergents and cosmetic industry. Long term dedicated services to our clients has helped us to win customer trust and has also expanded our client base to countries like Switzerland, Saudis and France.

Drawing our resources from nature we constantly experiment with new fragrances and perfumes to give our customers unique and soothing aromas.

Our Manufacturing Units...

We are in Mehta Chemicals...

- Fragrance
- Fine Fragrance
- Incense Stick (Agarbatti, Dhoop) Fragrance
- Cosmetics Fragrance
- Toilet and Detergent Fragrance

We are also Mfg. of...

- Food Flavor, Pan Masala & Tobacco Flavor
- Food Additives
- Natural Essential Oil

We are in Mehta Overseas India...

- Bio-Organic Fertilizer
- Bio-Pesticides (Herbal Based)
- Bio-Fungicides (Herbal Based)
- Bio-Stimulation
- PGR

We are in Mehta Bio-Tech...

- Bio-Culture Products like,
 - M1 (ONT Liquid with Compost)
 - M2 (ONT Powder with Compost)
 - Fungivex
 - Nematovex
 - Bio-Blast
 - Bio Crystal
 - Econitro
 - Bio Booster Gold
 - Phosphorich
 - Bio Potash Rich
 - Bio Zinc Rich
 - Potash King
 - Phos King
 - Easy MG
 - NPK King
 - Amino King

FUNGIVEX

FUNGIVEX is natural Fungus Vaccine which is made from natural and botanical extract it's gives 100 % protection agents. FUNGIVEX can be use in every types of crops, vegetables, fruit, potato for the protection against every type of fungal disease like wilt, white fungi, sukara etc. before sowing mix FUNGIVEX in soil and also give seed treatment which protect plant in primary growing stage from many pathogens. FUNGIVEX protects plant from all kinds of Fungus pathogen attacks.

Advantages of Fungivax

Protect plant against wilt, charmi, sukhara, pythium like all kinds of fungus diseases.

Privet farmer loss and increase farmer income.

Does not affect any soil bacteria, earthworm & natural eliminate, it's only kill fungus.

Seed & seedling treatment creates a favorable growing environment with a variety of plant health benefits.

FUNGIVEX 100 % Natural product so useful in Organic Farming.

How to Apply

1 Liter FUNGIVEX apply in 1 Vigha & 50 ml / 1 kg for Seed treatment after sowing on a first water use 1 L fungivex in 1 vigha or 1.75 L in 1 Acre.

Recommended crop

FUNGIVEX can be used in Every Fruit crops, Vegetables, Pulses , potato, jeera, sugarcane like every plants.

NEMATOVEX

NEMATOVEX is Natural Nematicide which is developed on the base of Israel Natural element technology it's natural element kill Nematode eggs, larva and adult stage of many plant pathogenic nematodes like root knot nematode, cyst nematodes , citrus nematodes etc, NEMATOVEX protect plant and prevent farmer loss .

Advantages of Nematovex

Gives 100 % freedom from Pathogenic nematodes.

kill nematode by natural process there for it's does not show any adverse effect on plant, farmer and farms it's eco friendly product. NEMATOVEX is 100 % Natural product so useful in Organic Farming.

How to Apply

1 Liter NEMATOVEX apply in 1 Vigha & 50 ml / 1 kg for Seed treatment after sowing on a first water use 1 L fungivex in 1 vigha or 1.75 L in 1 Acre.

Recommended crop

NEMATOVEX can be used in Every Fruit crops, Vegetables, Pulses , potato, jeera, sugarcane like every plants.

BIO BLAST

BIO BLAST is pure natural insecticide which is highly useful in controlling insect pest BIO BLAST contain natural herbal extract and it's kill plant insect by natural process , BIO BLAST is 100 % bio and eco friendly product.

Advantages of Bio Blast

Kill all pest like thrips , mealybug, whitefly , aphids , grasshoppers etc and protect farmer against financial loss.

Does not kill any plants friendly organisms like earth worm , honey bee and bio fertilizer bacteria also.

BIO BLAST is 100 % natural products it is useful in organic farming also.

How to Apply

Spray 80-100 ml / pump bio blast spray every 25 days on crop and protect plant against insects.

Recommended crop

Bio blast is used in chilly , tomato, potato , cotton, jeera, mango, tea, pomegranate, sugarcane, like every crops which is highly infected by insects .

Note : Do not use chemical pesticide with BIO BLAST

NEEMAYUR

NEEMAYUR is a bio insecticide. it's a based on botanical extract of Azadirachtin indica and neem oil which is natrly prevent plant harmful insects naturally NEEMAYUR is registered by Indian Pesticides Regulatory Authority - Central insecticides Board, Govt of Indian. (NEEMAYURE available in 10000 PPM & 1500 PPM)

Advantages of Neemayur

NEEMAYURE effectively controls most of the plant anime pests such as fruit borer of pomegranate, tomato and brinjal, Thrips, Jassids, Aphids and whiteflies, Flea beetles and other chewing insects like Helicoverpa arimigera etc and it's 100 % Eco friendly bio insecticide.

How to Apply

90 ml / 15 Litre water and spray on all crops.

BIO CRYSTAL

Bio Crystal is a natural larvicide based on a natural extract , BIO CRYSTAL prevent larva growth and protect plant against. BIO CRYSTAL also control pink bollworm on cotton and prevent farmer loss. BIO CRYSTAL is natural extract based products its totally safe for farmer and plant also.

Advantages of Bio Crystal

BIO CRYSTAL does not effect plant beneficial bee and other living organisms it's only kill plant enemy insects and it's larva.

BIO CRYSTAL 100 % natural product there for it's useful in organic farming also.

How to Apply

100-120 ml BIO CRYSTAL / 15 L water and apply on crop every 25- 30 days

Recommended crop

BIO CRYSTAL can be use in cotton, potato , vegetables, fruit crop, ground nut , oil seed crop tea , spice crop it's gives best result in every crop .

ECONITRO

ECONITRO is a liquid & Powder base nitrogenous bio-fertilizer, ECONITRO is microbial inoculantes of different varieties of Azotobacter spp. it's fix atmospheric nitrogen non- symbiotically and also soluble insoluble nitrogen in soil, ECONITRO arrange the availability of nutrients to the plant. ECONITRO is low cost, eco friendly organic input, supplementary to the chemical fertilizers.

Advantages of EcoNitro

Completes plants nitrogen requirement.

It's Reduces 30-40 % urea usage.

Access free atmospheric nitrogen and increase yield & quality of final product.

ECONITRO 100 % Eco friendly bio product it useful in organic farming.

Improves both plant and soil health and also aids in soil remediation.

How to Apply

1L Econitro in one vigh or 2 L / Acre During 1st water.

Seed treatment : 100 ml or 200 gm / 1kg seeds before sowing.

Soil treatment : 1 L or 2 kg powder mix with 100 kg FYM / Compost & Broadcasts in 1 acer

Recommended crop

ECONITRO is applicable in all crops like Cereals, pulses, oilseeds, sugar-crop, fruits plant, vegetables, potato, jeera, mango, paddy, tea, spice crop etc it's gives best result in every crop.

BIO BOOSTER GOLD

BIO BOOSTER GOLD is VAM (Mycorrhiza) based bio fertilizes which is increase the absorbtion are of roots from 100 to 1000 times more, BBG greatly improving the ability of the plants to utilize the soil resource. BIO BOOSTER GOLD provide ability to plant for easily absorb and transfer of all macro & micro nutrient. and BBG provide best growth to the plant and increase yield and quality of final product BBG also increase plant water uptake and holding capacity

Advantages of Bio Booster Gold

Provide richness in plant root and increase number of hairy root. Can reduce fertilizes requirements through improved plant nutrient uptake capacity.

Boost phosphate and zinc availability also improve plant disease resistance power.

100 % bio product and eco friendly which is useable in organic farming also.

How to Apply

2 kg / acre before sowing sprayed in farm and 50 gm / 1 kg seed coting

Recommended crop

BBG can use in all the crop like fruit crop, vegetables, nursery plants, pulses, jeera, potato etc.

UTTAM POSHAN

It contains all the nutrients (Nitrogen, Phosphorus, Potassium, Carbon, Minerals) required for the growth & development of plants. The micro-nutrients present in UTTAM POSHAN improves the yield & quality of the crop.

Advantages of Uttam Poshan

Improves soil health.

Helps in water retention in soil, thus resulting in decreased water requirement.

Helps in growth of soil micro flora.

Prevents land from becoming infertile and makes the land available for cultivation for longer duration.

Addresses the carbon deficiency in the soil.

Improves the yield & quality of crop.

How to Apply

3-5 bag/ acre

Recommended crop

For all the crops

Packing Size

50 kg Bag

PHOSPHORICH

PHOSPHORICH (PSB) is a bio fertilizer based on phosphorus solubilising bacteria *pseudomonas striata*. PHOSPHORICH solubilise insoluble rock phosphate which is present in soil and provide to the plant and complete plant phosphorus demand and it's increase plant growth and yield.

Advantages of Phosphorich

It's fulfill plant's phosphorus requirement.

PHOSPHORICH use decrease DAP use up to 40-50 %.

Promote root growth and increase yield and quality.

PHOSPHORICH is 100 % bio product and useable in organic farming also.

How to Apply

1 Liter FUNGVEX apply in 1 Vigha & 50 ml / 1 kg for Seed treatment after sowing on a first water use 1 L fungivex in 1 vigha or 1.75 L in 1 Acre.

Recommended crop

1L PHOSPHORICH use in one vigh or 2 L / Acre During 1st water.

Seed treatment : 100 ml or 200 gm phosphorich / 1kg seeds before sowing.

Soil treatment : 1 L or 2 kg powder mix with 100 kg FYM / Compost & Broadcasts in 1 acer

AZOSNITRO

AZOSNITRO is liquid or powder based nitrogenous bio fertilizer which is directly provides nitrogen to plants from root association, it's made from naturally occurring bacteria *Azospirillum lipoferm*. AZOSNITRO can actively fix atmospheric nitrogen in soil through a symbiotic relation with the plants AZOSNITRO provide nitrogen to plant by natural process.

Advantages of Azosnitro

Completes plants nitrogen requirement through nitrification.
Naturally produced plant growth promoting hormones IAA which increases plant growth and seed germination rate.
AZOSNITRO use decrease usage of urea up to 30-40 %.
Make plants's disease resistance and drought resistance.
AZOSNITRO is 100 % natural and eco friendly product which is useable in organic farming also.

How to Apply

1L Azosnitro use in one vigh or 2 L / Acre During 1st water.

Soil treatment : 1 L or 2 kg powder mix with 100 kg FYM / Compost & Broadcasts in 1 acre.

Seed treatment : 100 ml or 200 gm Azosnitro / 1kg seeds before sowing.

Recommended crop

AZOSNITRO is applicable in all crops like Cereals, pulses, oilseeds , sugar crop , fruits plant , vegetables, potato ,jeera, mango , paddy , tea, spice crop etc it's gives best result in every crop.

RAPID ROOT best quality product made with the help of biotechnology, RAPID ROOT help in seed germination , RAPID ROOT makes 100 % seed germination rate and make it faster, RAPID ROOT increase plant roots zone size hence plant absorb more nutrient from soil and promote plant growth and yield also increase fruit quality.

Advantages of Rapidroot

Makes completes seedling
Increases nutrient absorptions capacity.
Promote plant growth and yield.
Protect plant against heavy wind and increase plant resistance power.

How to Apply

Use 250 ml RAPIDROOT / acre during first water.

Recommended crop

RAPIDROOT is applicable in all crops like fruits plant , Cereals, pulses, oilseeds , sugar crop, vegetables potato, jeera, mango, paddy, tea crop etc it's gives best result in every crop.

RAPID ROOT

RHIZONITRO

RHIZONITRO is a liquid and powder based nitrogenous bio fertilizers, it's special design for legume crops. RHIZONITRO provide nitrogen to plants from the atmosphere by symbiotic associations with plant roots, RHIZONITRO contain different varieties of Rhizobium spp. It's induce the leguminous plant to form nodules in the roots and fixes the atmospheric nitrogen and fulfil plant nitrogen demand and increase plant growth and yields.

Advantages of Rhizonitro

Provide best growth to the legume plant
Increase legume crop seed size and weight
RHIZONITRO reduce urea usage up to 40-50 %.
RHIZONITRO is 100 % bio product it is useful in organic farming also.

How to Apply

1L RHIZONITRO in one vigh or 2 L / Acre During 1st water.

Seed treatment : 100 ml or 200 gm / 1kg seeds before sowing.

Soil treatment : 1 L or 2 kg powder mix with 100 kg FYM / Compost & Broadcasts in 1 acre.

Recommended crop

RHIZONITRO is suitable for application on leguminous crops such as Ground nut, Blackgram, Green gram, Red gram, Cow pea, Bengal gram, Mustard, Soy bean, French bean, Cluster bean, Lab-Lab, Sesbania and many more of the legume species.

BIO POTASH RICH

BIO POTASH RICH is a bacterial bio fertilizers which solubilising and mobilizing insoluble potassium from the soil and provide to the plant, BIO POTASH RICH produces organic acids and enzymes that help solubilise the fixed potassium into exchangeable form and make it assumable by plants and protect plant against potash deficiency

Advantages of Bio potash rich

Provide bio potash to plant and complete plant's potash requirement.
Increases fruit sweetness , color and size .
BIO POTASH RICH is 100 % bio product it's usable in organic farming also.

How to Apply

1L BIO POTASH RICH in one vigh or 2 L / Acre During 1st water.

Seed treatment : 100 ml or 200 gm / 1kg seeds before sowing.

Soil treatment : 1 L or 2 kg powder mix with 100 kg FYM / Compost & Broadcasts in 1 acre.

Recommended crop

BIO POTASH RICH is applicable in all crops like Cereals, pulses, oilseeds, sugar crop, fruits plant, vegetables, potato, jeera, mango, paddy, tea, spice crop etc it's gives best result in every crop.

BIO ZINC RICH

BIO ZINC RICH is bacterial base bio fertilizes which is bio zinc solubilise BIO ZINC RICH is naturally solubilise insoluble zinc which is present in soil as insoluble form and provide to plant and protect plant against zinc deficiency related problem also increase plant growth and yield

Advantages of Bio zinc rich

Complete plant's zinc requirement.

Can help in decrease use of chemical zinc up to 30 %

Help in making of soil fertile and soft.

Increases farmer income by decrease farming cost and high yield

BIO ZINC RICH is 100 % bio product it's useful in organic farming also.

How to Apply

1L Bio zinc rich in one vigh or 2 L / Acre During 1st water.

Seed treatment : 100 ml or 200 gm / 1kg seeds before sowing.

Recommended crop

Bio zinc rich is applicable in all crops like Cereals, pulses, oilseeds , sugar-crop , fruits plant , vegetables, potato ,jeera, mango , paddy , tea, spice-crop etc it's gives best result in every crop.

MINERAL KING

MINERAL KING is unique combination of all the macro and micro nutrients required for the growth and development of the plant. Application of MINERAL KING results in higher yield and improved quality. MINERAL KING contain Nitrogen, Phosphorus, Potassium, Calcium, magnesium, Boron, Zinc, molybdenum, Copper, iron, Sulphur, manganese with Amino acids & Gluconates as base material. Due to the presence of Amino acids & Gluconates, MINERAL KING is easily absorbed by the plants and it increases the size of the fruits and reduces flower/fruit drop thus increasing the yield. MINERAL KING is available in both Liquid and granule form.

Advantages of Mineral king

Increases the yield and quality of the crop & Enhances the flowering and reduces the flower drop

Helps in formation of chlorophyll , thus results in higher photosynthesis

Promotes the development of the healthy primary roots and their subsequent branches.

Increases the resistance power & immune system its Completely biodegradable Compatible with other-fertilizers/ pesticides

How to Apply

Liquid : foliar application: 2-3 ml / liter of water,

Drip irrigation: 1-1.5 liter / acer.

Granules : 20-25 kg / acer.

Recommended crop

MINERAL KING usable in all vegetables, fruits crops, cotton, cereals, horticulture crops, potato, jeera, papaya pomegranate , mango and all other crop

POTASH KING

POTASH KING

Potassium is a major constituent within all living cells. it is an essential nutrient and is required in large amounts by plants. Potassium acts to regulate water balances, Nutrient and sugar movement in plant tissue, derives starch and protein synthesis, disease resistance and nitrogen fixation.

To overcome all the major problems faced by using inorganic Potash, Maruti Agro Biotech have manufacture POTASH KING by Complexing Potassium with Gluconate and Amino acid. The active nature of amino acid and gluconates forms chelates with the mineral and results in better absorption of nutrients by the plant.

POTASH KING is available in both Liquid and Granule form.

POTASH KING is granular form is formed by using natural clay as base material. The slow releasing nature of the base material makes the nutrient available to the plant for a longer duration.

Advantages of Potash King

Helps in photosynthesis & formation of energy-high compounds (EHC), boosts Vegetative growth.

Increase the flower formation, fruit set, seed set & rate of maturity which results in higher yields.

Activates plant enzymes which help in the synthesis of carbohydrates, amino acids and protein

Improves the colour of the fruits, thus increasing the market value & consumer acceptance.

Prolongs the shelf life of the produce & Completely biodegradable and improves soil health

Compatible to be used along with other fertilizers and pesticides.

How to Apply

Liquid : foliar application: 2-3 ml / liter of water,

Drip irrigation: 1-1.5 liter / acer.

Granules : 20-25 kg / acer.

Recommended crop

POTASH KING usable in all vegetables, fruits crops, cotton, cereals, horticulture crops, potato, jeera, papaya pomegranete , mango and all other crop

AMINO KING

AMINO KING is Amino acid based Plant growth promoter. it contains amino acids in the form of protein hydrolysed derived from Vegetable Protein sources. AMINO KING is first of its kind product manufactured by hydrolysis of vegetable protein sources by sophisticated state of art technology. The active nature of amino acids helps in chelating & better absorption of nutrients by the plant. AMINO KING contains 30 % Protein hydrolysate along with other Micro nutrients and Trace elements for increasing the productivity of the plant under all geographical conditions. AMINO KING is available in both Liquid and granule form.

Advantages of Amino acid

Increases the yield and quality of the crop.

Enhances the flowering and reduces the flower drop.

Increases the chlorophyll content in the leaves leading to higher photosynthesis rate.

Increases the resistance power of the plant by strengthening IN immune system.

Increases soil micro flora and improves the health of the soil.

Compatible to be used along with other fertilizers/pesticides.

How to Apply

Liquid : foliar application: 2-3 ml / liter of water, Drip irrigation: 1-1.5 liter / acer.

Granules : 20-25 kg / acer.

Recommended crop

Amino King usable in all vegetables, fruits crops, cotton, cereals , horticulture crops, potato, jeera, papaya pomegranate , mango and all other crop

KUDARAT

KUDARAT

Kudarat is one of the best bio compost enhancer , which is made from different type of microorganisms, vermicast, natural potassium humate and organic amino acid mixture. KUDARAT increase soil fertility and yield. KUDARAT increase number of soil beneficial microorganisms and boost plant growth .

KUDARAT provides nutrients in an organic form to plants. It imparts stress tolerance to withstand adverse abiotic conditions. It induces better flowering and reduces flower dropping and Imparts better organoleptic qualities to the fruit. It improves yield through better grain formation and fruiting.

Advantages of Bio Kudarat

Increases functionality of compost and soil natural fertility

Increases soil water & Nutrient uptake capacity

Increases seed germination rate and seedling

KUDARAT is 100 % bio product & useful in organic farming also

How to Apply

Use 2 kg KUDARAT with bio compost and apply in 1 acre

Note : Don't use KUDARAT with chemical pesticides

NPK KING

Plants require three major nutrients – Nitrogen, Phosphorus & Potassium for its growth & development. NPK KING is combination of Nitrogen, Phosphorus, Potassium chelated with Amino acids. Nitrogen is the major component of amino acids, the critical element constituent of proteins and is necessary component in cell structure, plays very important role in cell division & reproduction. Phosphorus is vital for adequate root development and helps the plant resist drought. It enhances flowering and increases fruit and seed production. Potassium improves quality of seeds and fruit. It also helps to improve crop resistance to lodging, disease & drought. NPK KING also contains other nutrients in required amount for better yield and quality.

Advantages of NPK king

Promotes the development of the healthy primary roots & their subsequent branches.

Enhances the flowering and reduces the flower drop.

Helps in higher photosynthesis & boosts vegetative growth.

Increases the yield & quality of crop.

Increases the resistance power of the plant by strengthening the immune system.

How to Apply

Liquid : foliar application: 2-3 ml / liter of water, Drip irrigation: 1-1.5 liter / acer.

Granules : 20-25 kg / acer.

Recommended crop

NPK King usable in all vegetables, fruits crops, cotton, cereals, horticulture crops, potato, jeera, papaya pomegranate, mango and all other crop

MARUTI DIAMOND-95

MARUTI DIAMOND-95 is pure powder flex base potassium humate, MARUTI DIAMOND-95 also contain good level of fulvic acid and amino acid it's an ideal additive to boost bio-activity and improve the plant roots and growth.

Advantages of Maruti Diamonds-95

Improve plant roots and increase production.

Improve fruit-flower number and it's quality

Can help in maintain of soil PH level

Can react as natural chelating agent to magnify nutrient absorption.

Increase yield and it's quality .

How to Apply

Use 1 kg of MARUTI DIAMOND-95 in 1 acre.

Drip irrigation : use 5 gm/ L of water and apply in field

Recommended crop

MARUTI DIAMOND-95 is applicable in all crops like pomegranate & all fruits plant, Cereals, pulses, oilseeds, sugar crop, vegetables, potato, jeera, mango, paddy, tea, spice crop etc it's gives best result in every crop

MEHTA
GROUP OF COMPANIES

EASY ZINC

Nitrogen, Phosphorus & Potassium play a very important role in crop nutrition in addition to these major nutrients, Zinc is also essential for the plant growth and development.

Zinc is required for normal Photosynthesis and is directly/indirectly required by several enzyme systems and for protein synthesis. Zinc is needed for cell expansion, carbohydrate and protein development as well as the production of root growth hormones.

Easy Zinc is combination of gluconates and Amino acids fortified with Zinc in readily available form. Gluconates and Amino acids help the plant in better growth and also act as carrier for Zinc for plant uptake. Easy Zinc is available in both Liquid and granule form.

Advantages of Easy Zinc

Addresses the zinc deficiency in the crops.

Necessary for energy production, protein synthesis & supports root growth & increase leaf size.

Necessary for the formation of chlorophyll and carbohydrates increases

Nitrogen uptake & high protein contents in grain.

Increases the flower formation fruit set, seed set & rate of maturity which results in higher yields.

How to Apply

Liquid : foliar application: 2-3 ml / liter of water, Drip irrigation: 1-1.5 liter / acer.

Granules : 20-25 kg / acer.

Recommended crop

EASYZINC usable in all vegetables, fruits crops, cotton, cereals , horticulture crops, potato, jeera, papaya pomegranate , mango and all other crop

EASY Mg

Magnesium is an indispensable mineral for plant growth, for it play a major role in the Production of chlorophyll, on which photosynthesis depends. Any critical physiological and biochemical processes in plants are adversely affected by magnesium deficiency, leading to impairments in growth and yield. Easy Mg is complex formed by Amino acids, Gluconates & magnesium in readily available form for the plants. Easy Mg addresses the magnesium deficiency. Gluconates and Amino acids helps in better absorption of the mineral by the plant. Easy Mg is available in both Liquid and granule form.

Advantages of Easy Mg

Enhances synthesis of organic compounds which are useful for plant growth & functioning.

Helps in chlorophyll formation, hence increases the photo synthetic rate. increases the yield & quality of the produce.

Helps in Synthesis of amino acids & cell proteins.

Facilitates the utilization of other important nutrients by the plant.

It's Completely biodegradable and improves soil health & Compatible with other fertilizers/pesticides.

How to Apply

Liquid : foliar application: 2-3 ml / liter of water,

Drip irrigation: 1-1.5 liter / acer.

Granules : 20-25 kg / acer.

Recommended crop

Easy Mg usable in all vegetables, fruits crops, cotton, cereals , horticulture crops, potato, jeera, papaya pomegranate , mango and all other crop.

www.mgoc.in

PHOS KING

Phosphorus being the structural component of Nucleic acids & DNA, is essential for all Plants. Phosphorus plays a vital role in Photosynthesis, respiration & root development. Low level of Phosphorus within a plant causes stunted growth.

In order to address the phosphorus deficiency, Maruti agro biotech has launched PHOS KING, as readily available form of Phosphorus.

PHOS KING is a Protein Hydrolysate (Amino Acids) based plant nutrient having 14% Phosphorous (0n DB). Amino acids act as carrier material which results in increased uptake of phosphorus by the plant.

PHOS KING is available in both Liquid and granule form.

Advantages of Phos King

Addresses the Phosphorus deficiency in all crops & Helps in Photosynthesis & respiration.

Promotes the development of the healthy primary roots & their subsequent branches.

Enhances flowering & increases fruit and seed production Effective for the healthy crop production & higher yields.

Compatible with biodegradable & improves soil health & Compatible with other fertilizers pesticides.

How to Apply

Liquid : foliar application: 2-3 ml / liter of water,

Drip irrigation: 1-1.5 liter / acer.

Granules : 20-25 kg / acer.

Recommended crop

PHOS KING usable in all vegetables, fruits crops, cotton, cereals , horticulture crops, potato, jeera, papaya pomegranate , mango and all other crop
